
color of the day

Posted by jiceha - 2007/01/19 15:04

Hi,

I dont remember the way to change the color of the days. For example, saturday and sunday are rose and I would change for yellow but only for sunday , saturday in blue like the other days of the week.

Thanks for your help

If you are using the default Shadow4 skin the help file explains how you can edit it. The weekend appearance is defined in the calendar.xml file.
