
ChromophoreLou weather failed

Posted by Mortimer - 2013/02/21 04:37

For a while I have been using the code 7630 and it worked fine until today, now it shows code 7630?

So I followed your advice in a different thread and looked in the page source got a USCO0078, tried that FAILED, tried 0078 FAILED.

Hi

MSN Server maintenance...

or your firewall is blocking...

for me OK two code !

Colorado Springs code 7630 or USCO0078

<http://local.msn.com/weather.aspx?q=colorado%20springs-co&zip=80903&eid=7630>

testing !

Guess it was server as it's working again.

Thanks
