

Crashing, not sure why - log included

Posted by billfish - 2013/02/22 00:35

Rainlendar is crashing intermittently, presumably when it tries to update iCloud, but mostly iCloud sync is working as far as I can tell. Latest version of 64 bit software. Mac OS 9.

Log:

Re: Crashing, not sure why - log included

Posted by anoob - 2013/02/22 09:32

After view your log, I think the reason maybe is the too often . You setting it as 1 min, right?
Recommend you increase the values, maybe setting it as 15 min, like you had settting for Google-calendar (I found from log).

Re: Crashing, not sure why - log included

Posted by Rainy - 2013/02/22 10:19

If you get a crash you should include the crash log instead. Rainlendar's own log does not usually contain any information about crashes.
