
Notification by Cell Phone

Posted by rainlenderlover - 2013/02/27 10:05

Is there a way to receive calendar notifications by email to my cell phone? Can Rainlender do it, or is there a gadget or app that works with Rainlender to do it? Or can Rainlender events be imported to another program like Google Calendar to do it?

Google calendar is at least able to send you SMS alerts for the events. If you have Rainlendar Pro you can define the alarm type for the Google events directly in the event editor dialog.
