## Oldie but Newbie needs help

Posted by nettermo - 2013/03/05 03:05

---

Ugh! Not usually so tech challenged, but I am obviously missing something - or probably missing something obvious.... :dry:

How do I display multiple calendars on my desktop? More importantly, can the multiple calendars be set for different months? I really need to see at least 3 months at a glance on my desktop.

Other than this little problem, I am loving this calendar. Tried out a BUNCH of others and deleted every one of them. This one's looking very promising.

Thanks!

Nettermo

Welcome to the forum, Nettermo.

To add a "3 months view":

OPTION 1 (3 independent windows): right click -> options... -> skins -> advanced>>> -> open the "Shadow4" branch in the left tree -> click on "Calendar" and in the left-to-right arrow -> select "Calendar" in the right tree -> settins... -> window variables (upper) -> change "visible month" to the month you want to see. Repeat it 3 times (0 current, -1 previous, +1 next, from 1..12 that month).

OPTION 2 (grid view): as above, but add the "Grid calendar". Set X=3 and Y=1, and change the visible month (to see previous, current and next set it to -1)

Perfect!!!! Exactly the calendar I was wanting! And you used small words and clear instructions so even I could do it. :-D Thanks so much, Jorge, you made my day! Hope yours is great, too.
