## stop fade out

Posted by bobbiev - 2013/03/07 10:45

---

I have vision problems and want Rainlendar v. 1.10 on my Win 7 32-bit pc to stop fading. What setting do I use to get this to happen?

Thanks, Bobbie

Welcome to the forum, Bobbie.

The windows fade when the cursor pass over them or away them? If yes, then you need to change the opacity in right click -> options... -> general tab -> opacity, "normal" and "mouse over" both to 100%.  
Another option you can use is to disable the antialiased fonts (that blurry border around characters). To do this, right click -> options... -> advanced tab -> general -> uncheck "use antialiased fonts".

EDIT: Did you want to say version 2.10? (1.x version didn't exists)

You are correct, it is version 1.10. Your suggestion to change the general> opacity> 100% worked. Thanks.
