## Two accounts with Remember the milk

Posted by WhiteTiger - 2013/03/12 13:54

---

I need to link to my two accounts in Remember the Milk.

If I create a new calendar, I can only choose the list.

If I copy the first RTM calendar, then I cannot modify parameters.

What I have to do?

Unfortunately it's not possible to use two different RTM accounts with Rainlendar because the authentication token is shared between all task lists. The only way at the moment is to run two separate instances of Rainlendar with their own settings (see portable installation in the FAQ).
