
Week View - Today Position no longer shifting

Posted by robertm999 - 2013/03/13 16:30

Since upgrading day of week in Week View remains on Monday. It had been set to change the first column to display the current day of the week i.e. Today_Position in options and ini set to zero. My configuration is:

Rainlendar Pro

Version 2.11.1 (b129) 64 bit Build on Mar 11 2013

Plugins

CalDAV Calendar v1.1 (b129)

Comma Separated Values v1.2 (b129)

Google Calendar v1.11 (b129)

iCalendar Format v1.10 (b129)

Rainlendar Ini Format v1.3 (b129)

Network Shared Calendar v1.10 (b129)

Microsoft Outlook v1.11 (b129)

Remember The Milk v1.5 (b129)

Toodledo v1.1 (b129)

Any help would be appreciated. Thanks.

Thanks, I figured it out. I needed to set the today position to 1 not zero.
