## Termine / appointment

Posted by Kingpui - 2013/03/17 11:33

---

Hallo,

ich habe das Problem mit Rainlendar das er einfach meine Termine nicht speichert. Wenn ich den PC runterfahre und am nächsten Tag oder Stunden später wieder rauffahre sind sie weg.

Ich bekomme mein speichern der Termine immer folgende Meldung:

SCHREIBFEHLER

Es konnte keine tempöre Kopie der Datei ..... erstellt werden

Hello,

I have the problem with Rain Lender that he simply does not save my appointments. If I'm going down the PC and the next day or hours later to go up they are gone.

I get my save the dates are always the following message:

WRITE ERROR

Unable tempöre copy of the file ..... be created

Willkommen im Forum, Kingpui.

Welcome to the forum, Kingpui.

Which version of Rainlendar and Operative System are you using? (sometimes this helps)

Check the full log debug for errors ([http://www.rainlendar.net/cms/index.php?option=com\\_easyfaq&Itemid=26#faq21](http://www.rainlendar.net/cms/index.php?option=com_easyfaq&Itemid=26#faq21))

Is it an offline copy of an online calendar or just a local calendar?

Do you have access to the folder? (administrator, etc.)

Rainlendar2 makes a backup before adding a task, and because it can't, the task are not added.

Did you make a portable installation? (copy the rainlendar2.ini file to the Program Files folder)  
Is there the file Aufgaben.ics in C:\Program Files\Rainlendar2 ? (I suppose yes because it reads 10 tasks from this file)

This happens with this calendar only? Is the only calendar you have?

=====

You cannot store the \*.ics file to the "Program Files" because the application is not allowed to write to there. You should store the calendar file e.g. to your Documents folder.
