## Color Days Red/Green

Posted by Bordito - 2013/03/21 09:30

---

Hi Guys,

I would like to color Days in my calendar window in different colors(Red/Green). Is there any skin/feature to do that with Rainlendar? Thanks for your Help.

Best Regards,

Bastian.

The normal days or the ones which have an event? The appearance of the events is defined by the categories so if you change the color of the events with them. Note that this depends on the skin though. If you are using the default Shadow4 skin it has also color categories which you can use.
