## Rainlendar was not able to refresh the settings

Posted by billfish - 2013/03/24 09:58

---

I downloaded an ics file from HebCal.com, put it in a folder in my Documents folder, and tried to use it as the source of a read-only calendar. I got the error "Rainlendar was not able to refresh the settings successfully" and gave me the choice to fall back to a backup settings file. Message and ics file attached.

The dialog is a symptom of an earlier crash which happened when the file was read. Seems to happen with the 3rd party component that was upgraded. I'll see what exactly causes the crash.
