
Can't install any vrs of Rainlendar. Kubuntu 12.10

Posted by jpxsat - 2013/03/25 19:58

Well... the title says everything...

Tried to install last version though `sudo dpkg -i` and what i get is:

```
rainlendar2-pro dépend de tofrodos.  
rainlendar2-pro dépend de libjpeg62.  
rainlendar2-pro dépend de openssl (>= 1.0.1).
```

`dpkg` doesn't install dependencies automatically so you need to install them first before installing Rainlendar.
