Skin Darkness

Posted by klammeraffe - 2013/03/27 00:53

_____

Hello,

I'm using since a long time the skin "Darkness v1.1. I like to have special icons in the double calender. Unfortunatly I lost the configuration, how to handle it, that just special catogories be in the calender, other not.

Can soemone give me a hint, where in the XML-files I can configure this?

Thanks

Karl

If I am not understand mistake, you hope: in the category field of events/tasks editor dialog, show only the categories you want using, right?

Or, you really want to do what? more detail will better...
