## Insert Images and Pictures

Posted by marcelo.betel - 2013/04/02 08:21

---

Hi there!

Once more, I must have to thank you for this great tool.

I use it like my CRM and would be a cool add to be able to insert images to de ToDo descriptions window.

Any chance?

I don't think the iCalendar standard supports embedded binaries. It could be done with custom properties but that would cause problems with 3rd party calendars so probably not.
