Toodledo periodically stops refreshing

Posted by Dmitrij - 2013/04/02 09:15

_____

Periodically Toodledo stops get info from the web service. For days.
I found only one way to fix this - delete and recreate Toodledo calendar.

_____

Do you mean that even refreshing Rainlendar does not update the calendar? Try running Rainlendar in the debug mode
and check from the log what exactly is read from the Toodledo's server and if it contains any errors.

_____

Correct. Refreshing does not update the calendar.
I will try to debug it.

_____

8:33:45 AM: Home: CURLINFO_TEXT: connected
8:33:45 AM: Home: CURLINFO_TEXT: Connected to api.toodledo.com (72.4.112.215) port 80 (#0)
8:33:45 AM: Home: CURLINFO_HEADER_OUT: GET /2/folders/get.php?f=xml;appid=Rainlendar;key= HTTP/1.1

User-Agent: Rainlendar-ToodledoPlugin/1.0

Host: api.toodledo.com

Accept: */*
8:33:45 AM: Home: CURLINFO_HEADER_IN: HTTP/1.1 200 OK
8:33:45 AM: Home: CURLINFO_HEADER_IN: Date: Sat, 06 Apr 2013 12:33:49 GMT
8:33:45 AM: Home: CURLINFO_HEADER_IN: Server: Apache/2.2.3 (Red Hat)
8:33:45 AM: Home: CURLINFO_HEADER_IN: Content-Length: 33
8:33:45 AM: Home: CURLINFO_HEADER_IN: Content-Type: application/xml
8:33:45 AM: Home: CURLINFO_HEADER_IN:
8:33:45 AM: Home: CURLINFO_DATA_IN: Invalid key
8:33:45 AM: Home: CURLINFO_TEXT: Connection #0 to host api.toodledo.com left intact
8:33:45 AM: Home: Result: (0) 200 OK.
8:33:45 AM: DEBUG: Invalid key
8:33:45 AM: DEBUG: Home: The folder id for Home could not be found.
8:33:45 AM: DEBUG: Download finished: http://www.rainlendar.info/download/version (0) 200
8:33:45 AM: DEBUG: No new version available.
8:33:45 AM: DEBUG: Download finished:
http://weather.msn.com/rss.aspx?wealocations=wc:CAXX0255&weadegreetype=C (0) 200
8:33:46 AM: DEBUG: Redrawing window Weather took 46 ms

Now, only removing and adding the calendar "Home" will help.

_____

Found the problem. Rainlendar does not update the expired authentication token if the Toodledo folder has been

defined. I'll fix this in the next build.
