---

Hi all,

Just wondering - I have five different Outlook accounts, is it possible to sync all five accounts through Rainlendar?

Thanks!

You can create multiple Outlook calendars in Rainlendar.

Yes, but is it possible to have them all synced to the one calendar, so I don't have to cycle through 5 calendars to see the days events?

Rainlendar shows the events from all calendars in the same window by default. You can also create multiple windows which show only specific calendars if you wish.
