
Problem with week num

Posted by kinou - 2013/04/17 14:10

I use shadow4 skin with Version 2.11.1 (b129) 64 bit

The first day of week is set to saturday.

"Week number delta" is set to 1 (as explained here

In the calendar and the month view, the Week numbers are correct, but in week view it is not.

For example, today, the week num is 16 in both calendar and month view, but it's 17 in week view.

So I think there is a problem.

Kinou

The reason why this happens is that the time item which shows the week number is separate from the actual week schedule item. This means that it calculates the week number from the current day instead from the week's start day as defined in the settings. I'll see if that could be fixed somehow.
