
X-WR-CALNAME for holidays

Posted by Rhiandor - 2013/04/30 14:33

When I try to insert the holidays for germany, it shows me the dates in blue.
But I will yellow.

Here is the beginning of the ics-file - generated from <http://www.ifeiertage.de/>

```
BEGIN:VCALENDAR
VERSION:2.0
METHOD:PUBLISH
X-WR-CALNAME:Feiertage
```

"Feiertage" is german for holidays.

In the rainlendar2 folder I found a file called "Default". There are the same entrys like in my ics file. But one thing has changed:

```
BEGIN:VCALENDAR
PRODID:-//Rainlendar/iCalendarPlugin V1.10//EN
VERSION:2.0
METHOD:PUBLISH
X-WR-CALNAME:Standard
```

What must I do, so that the blue color will change into yellow for holidays?

mfg Rhian

Welcome to the forum, Rhian.

I can't open the site. Did you download the ics file or is it a network shared calendar?

The color is got from the categories. Search for the events in the ics file and check if the line "CATEGORIES:Feiertage" or "CATEGORIES:Holiday" exists.

If not, after downloading the ics file, add the file as iCalendar and select "Holiday" as the Visual Category.
