
Icons Pack

Posted by Jorge_Luis - 2013/05/04 10:08

http://www.rainlendar.net/cms/images/fbfiles/images/icons_pack_v1.png

This is a first second attempt to create an icons pack. This version has the colored icons from a skin (I can't find the author, but I'm sure I took it from this forum). Also: boxing gloves, hamburger, hourglass, pizza, QR code, bearded man, earth, connector, camera, cake, broom, balls (baseball, basketball, football, soccer, tennis, volleyball), fire, cutleries.

- 1) Download the zip file attached
- 2) Install the addon for Shadow4 skin
- 3) Refresh Rainlendar2.
- 4) Done! http://www.rainlendar.net/cms/images/fbfiles/files/icons_pack.zip

The file icon pack.r2skin-addon where you/he/she must be installed? In my pc Rainlendar2 has two runs:

- 1) C:\Programmi\Rainlendar2\skins
- 2) C:\Documents and settings\admin\.rainlendar2\skins.

Thanks for the help.

You excuse my ignorance.

:blush:

The file doesn't need to be copied. If you had installed Rainlendar2, you only need to double click on the file in the Windows Explorer and it will be installed automatically.

or with command line (riga di comando):

(for skin) rainlendar2.exe -i .r2skin

(for addon) rainlendar2.exe -i .r2skin-addon

To use the icons, you will need to edit / create a category and set the small / large icons.
