## First letter upper case syntax

Posted by redfox - 2013/05/06 12:10

---

Please, what is the Rainlendar XML syntax for making the first letter in a word upper case?

Since day names in my language are displayed all in lowercase (%A), I need to transform them inside the `<td>` element.

I tried some classic CSS or inline style elements like `capitalize` or `ucfirst`, but nothing worked. In the original skin files, there is only `uppercase="1"`, but this capitalizes all letters, not only the first one.

Thank you.

Welcome to the forum, redfox.

I think that currently the Rainlendar XML has not such syntax yet.

There is a similar post :

[http://www.rainlendar.net/cms/index.php?option=com\\_kunena&Itemid=42&func=view&id=6409&catid=4#6409](http://www.rainlendar.net/cms/index.php?option=com_kunena&Itemid=42&func=view&id=6409&catid=4#6409)

You should to think other way to do it, like use script or translation(recommand).
