## Window Positions

I am using the Shadow4 v1.10 skin and I am unable to move the windows around. Wouldn't be such a big deal but the ToDo list is under the Events list so I can't read it very well. Tried searching for an answer but nothing came up. Also I can't seem to find any variable fields where this can be changed under the Options. Any help would be appreciated. Welcome to the forum, sattamander.

Maybe you activate the check box "lock window in place" in the general tab in options.

BINGO! Thanks Jorge. Don't know how I over looked that. I guess the eyes are getting worse than I thought
