## Remove Weekends from Month View

Posted by muyesugi - 2013/05/09 14:24

---

I've commented out AND .  
I've also tried setting the property on both of the above.

Any suggestions on how to completely remove weekends from the Month view?

Thanks in advance

Welcome to the forum, muyesugi.

I'm think that's not possible remove the weekend days because the Month View as the Calendar View uses the GRID layout, and this is generated internally as a full month (weekends included).

EDIT: You could trim the size of the window to hide the weekend days. Are you using a Monday or Sunday first week day?

I've been testing, and if you use the Monday as the first weekday, using the default Shadow4 Month View, you only need to change 2 things:

- \* Change the w of the "Month View.calendar" from "(%Calendar\_width% - 5)" to "(%Calendar\_width% + 195)" (to hide Saturday an Sunday)
- \* Change the x2 of the "Month View.background" from "0" to "10" (to extend the background color).

EDIT: Well... not work too well... I still can move the event from these days there are not really invisibles...

Great idea! Thanks, I'll play with the width.
