
How to remove birthdays

Posted by tonicgoofy - 2013/05/21 01:10

I would like to know if it was possible to disable birthdays coming from my outlook calendar?

In outlook I can hide the birthday calendar, but Rainlendar seems to see the calendars as one.

Uncheck "Read birthdays from contacts" in Options->Calendars.

That's the thing, it isn't checked.

Hmmm... that would mean that they are normal events like all the others so Rainlendar cannot know which is which. If the birthdays use a category you can try to filter them from the calendar window by defining the "Excluded categories" setting in Windows->Settings->Calendar.
