
Occurrence (Répétition)

Posted by scn68100 - 2013/06/24 03:56

Bonjour,

Il serait bon d'avoir la possibilité de renouveler un événement ou une tâche suivant le jour de la semaine, et non pas selon une date

C'est-à-dire choisir le jour de l'évènement

Exemple : renouveler tous les Lundi, Mercredi, Jeudi

Cordialement

SC

Hello

It would be good to have the option to renew an event or a task following the day of the week, and not by a date

I.e. choose the day of the event

Example: renew every Monday, Wednesday, Thursday

Kind regards

SC

Please, check "Recurrence"(Repetition) tab in the Event/Task window.

Change the interval in dropdown list to "weeks" and You will see the checkboxes, defining the days of the week, when the event should happen.

If You need something like "last friday of the month", select the first appropriate Friday, then change the interval to "months" - and very helping radio buttons will appear.

Bonjour,

Désolé de n'avoir pas su trouver de suite la solution !

Mon pauvre anglais ... Je n'ai pas su comprendre !

Merci

Hello

Sorry to have failed to immediately find the solution!

My poor English... I didn't understand!

Thank you
