## Tree in To Do List

Posted by bombjack\_it - 2007/01/24 08:53

---

It maybe useful, almost for me, that the to do list can be organized as a tree : when I click the activity, I want to organize the information not only as plain text but as tree.

Each element of the tree is a step or substep of an activity, and it could be selected for completion.

This thing can be very useful.
