
How to display 'wake up time' after snooze

Posted by rhino - 2013/07/06 16:47

Hi,
I've snoozed an item a few days ago but now I'm not sure when it will awaken again.

1. Is there any way to see the awaken time?
2. Probably a feature request but I think it would be a good idea to display the awaken time in the event editor window, maybe to the right of the 'Start time' 'End time' in the form of 'Snoozed at:' 'Awaken at'
3. Is there a way to see all snoozed items? Again, probably a feature request - from the manager window a button 'Show snoozed' ? This will show all *PAST* events that were snoozed and are schedule to awaken at some time. Something like 'Item name , Original alarm , Snoozed at , Awaken at'

Thanks.

It's not possible to show the snooze times but I can add the information at least to the manager. I'll add this to my backlog.

Sounds good,
Thanks.
