
How to show completed tasks are in RTM?

Posted by zyxfsky - 2013/07/14 05:19

I use remember the milk. I find that Rainlendar don't show tasks when are completed in RTM. I want to see them in Manager. I know what I have done. But now I can't see them. :(

How to show them?

Unfortunately it's not possible. Rainlendar reads only the incomplete tasks from the server. You need to use the RTM's website to check the completed tasks.
