
Customization of my \"to do\" list

Posted by Nate385 - 2013/07/22 14:20

Hi everybody!

I've downloaded this nice application and obviously I want to customize it. But, I've been trying to change a specific thing for a while, but no results yet.

So, what I'd like to attain is to see my daily task appear in a specific color and when it is done, this very task has to be stricken through by itself.

But the problem is that by default this software gives me only either the color for my daily task and when it's completed, impossible to strike through, or one basic color for my task (white), and when it's completed, it is automatically stricken through.

I have either this: 1) <http://imageshack.us/photo/my-images/580/qbkm.png/> or this: 2) <http://imageshack.us/photo/my-images/708/t7pq.png/>

That's why I'd like to find out how to combine it to choose one specific color for each category and simultaneously to have it crossed out when the task is completed. Here is what I'd like to have: <http://imageshack.us/photo/my-images/69/kfk5.png/>

And this, for the same category.

Here is the code for 1):

Here is the code for 2):

So, my question is: How to combine these two above codes in order to get on the one hand the color wanted for a specific category and on the other hand to have the task stricken through when it's completed?

Hope that someone can help me :P . Thanks in advance!

Welcome to the forum, Nate385.

You can also edit the "Todo List" window (todolist.xml).
Change the element from font.normal to font.normalcompleted, as here:

Then, add this line in elements.xml

Hey, sorry for this late reply, but I've been busy all week long.

So, first, thanks for helping me. Then, I've done what you advised me to do, but it still doesn't work. Here are my new codes:

In the "Todo List" window:

In short, I've changed the second line of the above code, from `font.normal` to `font.normalcompleted`, as advised. But I wonder if I should change something else somewhere else maybe?

Then, in the `elements.xml`:

Here I've added the last line in `elements.xml` as you said.

Then, I backed up everything and tried it out. And still the same thing (does not work).

May you give me further explanations please? Thanks in advance :)

Sorry, I'm trying to find a way to achieve what you want, but now I'm thinking that's not possible. There are priorities. And the priority from Completed is bigger than the categories, and by that all the events will share the same appearance. But if you interchange the priorities, then the events will show the colors but the strikethrough will never appear.

Re:Customization of my \"to do\" list

Yep I knew that. I had already interchanged the priorities in order to have the colors wanted.

So ok! Nevermind. I'll have to do without it.

And if all of a sudden you come up with a solution, don't hesitate to share it :).

There is a not perfect solution :

In completeditem tag (todolist.xml):

- 1) reduce the priority.
 - 2) add a image, similar a strikethrough line, to cross the default text.
- e.g.

But, it has some limits :

- 1) the strikethrough line is always cross the window.
 - 2) the task summary can only on one line.
- (Of course, you can modify the image to more match what you wants.)

The picture is a good workaround (maybe replacing the progress bar?) but the appearance can't be used because it replaces the event's color if the priority is bigger than the category's priority.

That means the idea of anoob is impossible to set up?

It looks like there are still no ways to work this issue out? In this case, I'll have to accept it and do without it :P

Do you have try it ?

I thinks the idea of me is the most likely methods to achieve the effect you want.
At least, it can achieve the effect you want, when I test it.
