
[Solved] \"In Progress\" Not Work

Posted by anoob - 2013/07/26 01:50

(After test, this issue is begin from b130)

- 1) Create a task.
- 2) Open Task Dialog, select >> >> , but nothing change on todolist window (no display progress bar).
- 3) Reopen Task Dialog, can found the is still keep on the prev status.

But, if

- 1) Create a task.
- 2) Select >> from Context Menu, can see the progress bar display at todolist window.
- 3) Reopen Task Dialog, can found the is display what it should be. And now, if select a new , it will working normal.

So, I thinks the problem is : If select from Task Dialog, program forgot to change the string "STATUS:XXXX" (in ics file) to "STATUS:IN-PROCESS".

Good catch. I think i broke it when the timezone support was added. I'll fix this in the next build.
