## How to \"uncomplete\" a recurring task

Posted by SomeOldGuy - 2013/08/03 22:22

---

I mistakenly marked a ToDo task as complete. It's a weekly recurrence. It should show Aug 10 as the next due date, but it is showing Aug 17. How can I mark the Aug 10 task not complete?

The completed data can be reset if you edit the task's due date. Note that this will clear the date so you need to set the task completed again.
