## Changing Years

Posted by cwfrizzell - 2007/01/25 11:21

---

I want to make a button that cycles through years. I tried the following:

```
Window=0
X=-20
Y=5
Command=!RainlendarShowNext
BitmapName=button-right.png
```

I get no change. Any help?

---

Try without the brackets (Command=!RainlendarShowNext 12).

That's it! Thanks Rainy!!!

I suppose the no brackets syntax applies throughout for various commands (ie !RainlendarHideltem )?

yes. the brackets are intended to show that it's a variable you have to input.
