
Rainlandar2 crashes after resuming win7

Posted by squalo - 2013/08/04 06:40

After resuming Win 7 (64bit) from Standby, rainlendar (V2.11.1.0) crashes everytime.

These are Meta data form Windows:

Problemereignisname: APPCRASH
Anwendungsname: Rainlendar2.exe
Anwendungsversion: 2.11.1.0
Anwendungszeitstempel: 513e4830
Fehlermodulname: wxbase294u_vc_rny.dll
Fehlermodulversion: 2.9.4.0
Fehlermodulzeitstempel: 506830fb
Ausnahmecode: c0000005
Ausnahmeoffset: 000000000009afdf
Betriebssystemversion: 6.1.7601.2.1.0.256.48

Here is the link to the Dump file.

The crash seems to be related to an alarm in one of the events. Try the latest beta version and see if the crash happens with it too. If it does, try to disable all your calendars and see if that fixes the problem. If the crash does not happen when your calendars are disabled then one of your events is causing it. It would be very helpful if you can find out what event this is e.g. by moving your events between two calendars until you get the crash again.
