
Syncing to/from Google Calendar

Posted by Tan - 2013/08/10 03:17

Can I choose when I want Rainlendar to sync? How?

I do not want it to sync every time I get online as I keep getting error messages when I am offline

Welcome to the forum, Tan.

You can quickly disable/enable it.

The fastest way to do it is :

Right-Click main calendar (open context menu) > Calendars > click to toggle it.

http://www.rainlendar.net/cms/images/fbfiles/images/2013_08_10_2.png

The fastest way to do it is use "Calendar List" window.

Add (activate) "Calendar List" window :

Right-Click main calendar window (open context menu) > Options > Skins > Add "Shadow4 - Calendar List" from the left side - "Available skins", into the right side - "Active skins" > OK.

Then you can easy toggle is disable or enable.
