## Are there some skins for my needs?

Posted by Ghost - 2013/08/26 10:18

---

I totally love this awesome calendar! It become so nice pair with my favorite AllMyNotes organizer, and I finally (!) got all my tasks sorted nicely. But I need some more options. May be I can get skin (or skins), wich would help with it?

1. Font, bigger that standart one in ToDo list;
2. Two or more ToDo lists at once;
3. Different font colours in ToDo list for each task (by user choice);
4. Bright marks (like V J) near done and striked tasks;

Are there some alike skins? Thank you.

Not sure about the skins but you can increase the font size from Options->Advanced->Font scale. Multiple list windows are possible too ([http://wiki.rainlendar.info/index.php?title=Multiple\\_to\\_do\\_lists](http://wiki.rainlendar.info/index.php?title=Multiple_to_do_lists)). The color of the tasks in the list is defined by the category so you can just assign a different one for each task.
