
Different colors for Google Calendars

Posted by Xococ - 2013/09/12 05:55

Hi,

I has a look to some support issues and tried to find a solution. But unfortunately without success :(

I use 5 Google calendars in one view. Is it possible to see the events of each calendar in different colors? At the moment all entries are blue and it's hard to differentiate the events. I saw the possibility to add the name of the calendar, but colors are more helpful ...

Regards
Stephan
