## Holiday calendars

Posted by okh - 2007/01/26 09:38

---

Is it just me, or has anyone else had a problem finding good general calendars, with traditional holidays (in .ics format)?

My private one is based on multiple sources and has national days (the ones I care about), movable holidays for the next 10 years (Easter etc - but only traditional European) lots of other notable days.

Is there a good selection of reliable holiday calendars somewhere?

If not, maybe a collaborate effort is worth considering?

ok

Maybe you can find what you want here:  
<http://icalshare.com/index.php?topic=holidays>

Thanks. You are right, there are shared ics files around. Just so much nonsense at icalshare (and the one I did use had a very minor inaccuracy). I still think having some decent ics files lying around rainlendar.net could be a good idea.

ok
