_____

I downloaded the "Lite" and the "Pro" versions . When I try to open them , I get a message that the file "MSVCR71.dll" cannot be gound and unable to open . Is this a Rainlendar file ??? or a Windows file ??? I am running Win XP Pro . Thanks

From the FAQ:

You don't have the C Runtime library that Rainlendar requires.
You can install the .NET framework from Microsoft which contains also the missing DLL:
http://msdn.microsoft.com/netframework/downloads/updates/default.aspx
Or you can get just the dll from dll-files.com (copy it to the same folder where Rainlendar was installed):
http://www.dll-files.com/dllindex/dll-files.shtml?msvcr71

Hope that helps :side:
