
No more event popups

Posted by Kea - 2013/09/16 13:59

Hi, I notice that I'm not getting any event reminder popups anymore. Anyone know what could have caused them to stop or what settings to check on?

Thanks

Check that the skin you are using has an alarm window (Options->Skins) and that the calendar is not ignoring the alarms (Options->Calendars, Ignore alarms).
