
10 day Weather Widget?

Posted by spikul - 2013/09/22 14:14

I have the weather widget working with Rainlendar. But, would like to have 10 days.

www.weather.com has 10 days.

Has anyone tried to attach the skin this site and been successful?

I tested a few cities in Africa, Europe and China and was able to get 10 days of weather. I think that it may work for any city on the globe.
