

Failed to write the outlook item.

Posted by brianoh68 - 2013/09/23 21:13

I created outlook in rainlendar.(I use up to date rainlendar and outlook 2013)
when I make new event message, popup like below.

'failed to write the outlook item. There are no folders available where it could be stored.'

Please help me!

Log file

Try clearing the "Folders" setting for your Outlook calendar in Options->Calendars if it contains anything. If that doesn't help please run Rainlendar in the debug mode and send the debug log to me (use the support email address and include a link to this forum thread).
