## Can help be translated?

Posted by Pantufllo - 2007/01/27 09:00

---

I have Rainlendar Lite with Spanish language, but Rainlendar help is still in English.

I would like to know how can I get it into Spanish, or if I could translate it by myself or if it's impossible...

Thank you.

I don't think I'm going to distribute translated versions of the help file with Rainlendar since keeping it up to date would be too big task. But if you want to translate it then go ahead. I can add a link to it to the website. The contents can be extracted from the file by unzipping it.

No problem about keeping it updated... I just thought that other Spanish users could find the translated help useful.

If you have posted the file, please show the link location.
