
Sort events depending of calendars order

Posted by ozzii - 2013/10/03 05:12

Hi,

Here is an example:

3 calendars ; cal1 cal2 cal3 (order like this in the calendar options)

events: in cal1 : 10 20

events: in cal2 : 50 60

events: in cal2 : 30 40

Now, the events are sorts like this:

10 20 30 40 50 60

I would like that they are sorted in that way : calendar and events.

so i will have (depending of the order of the calendars in the options):

10 20 50 60 30 40

And if I put calendars in that order: cal2 cal3 cal1, I have:

50 60 30 40 10 20

Did I make myself clear enough? :blush:

Wouldn't it be confusing if the events were not in chronological order? Or do you mean that the calendar sorting would be used only if the events have the same start time?

Well in these cases they have no time.

these are events for a day.

Sorry forget to tell that. :blush:

And of course after that first list the others events (with time) are sorted like now.

I ask this because I prefer to see some calendars before others.

A sort of priority if you prefer.

And of course, all of this optional B)
