
Icons

Posted by saroman - 2006/10/28 15:27

After installing Rainlender 2, the custom icons I was using for various events in the previous version no longer appear on the calendar. Can I still use them and, if so, how? Thanks.

The categories (the old Rainlendar called them event profiles) have been changed somewhat so there might not be appearance defined for all the ones that the old version used. You can either change the events to use the new categories or edit the skin to have the appearance for the old event profiles (there will be instructions how to do this later).
