
how to import data?

Posted by nordligeniels - 2007/01/27 12:46

I've just downloaded the latest version of Rainlendar, but it didn't import my data from the previous version automatically. I've read FAQ but it didn't really help me. what to do? The thought about losing my data is killing me!

This also worked for me. I just wanted to get a new keyword in here for anyone that searches the forum for "import events" like I did and couldn't find this thread. ;)

IMPORT EVENTS
