## Can not create new tasks, no calendar available ..

Posted by Goldfish - 2013/10/16 14:41

---

Hi there,

it all began in the 2.11.1 pro.  
Suddenly i cant create new tasks,  
because i cant pick any of my calendars  
during the creating process.

Now im on latest Beta,  
problem still occurs.

Tried both; x86 & x64  
Restarted serveral times.  
And tried a bunch of skins.

I got no more ideas.  
perhaps this is a well known problem?  
I searched, but my english is not the best.  
Hope i didnt miss some obviously facts/data/threads.

Thnx in advance,  
da Goldfish :-\* :-)

The reason probably is that you don't have any (enabled) calendars which can store tasks. Check if you have e.g. the Default calendar enabled as it at least support tasks.
