
reminder not working for recurring tasks

Posted by Ace_NoOne - 2007/01/28 09:23

Hi there,

I just noticed that the reminder function does not work properly for recurring tasks.

I have a task reminding me of weekly backups; it's set to Sundays, 15:00, and repeated "every 1 weeks" (obviously). The alarm is set to 1 day in advance, but it never shows up - unless I deactivate the recurrence, which kinda defeats the purpose in this case...

This is probably caused by the same issue as is causing the other weekly recurring event bugs. I'll try to fix it for the next version.

Good to know it's taken care of. :)

Is there an ETA for the next version yet?
