## Multiple Instances of Rainlendar during Start up

Posted by ksahix - 2013/11/07 07:17

---

Hi, I need some help keeping my 3 calendars open when I restart my computer. Right now, it closes two of them while keeping the original one open. Any help is appreciated. Thanks.

Let me add that I'm using 3 calendars with the current month, next month, and the month after that. I have to go to the calendar settings to change "visible\_month=0" "+1" and "+2". After every restart, two calendars disappear and if I want to reopen two more instances, I have to re-edit their settings, which is a huge inconvenience.

Welcome to the forum, ksahix.

Which version of Rainlendar are you using?

I remember an old version which had this bug using multiple windows.

Did you download the latest version: (stable) or (beta)

Question is: How are you keeping (open) 3 calendar's windows? run rainlendar 3 times?

It is wrong way, the right way is: just add the other 2 calendar's windows? or use "Grid Calendar" window.

You can see the FAQ: Can I display multiple calendars at the same time?

([http://www.rainlendar.net/cms/index.php?option=com\\_easyfaq&Itemid=26#faq7](http://www.rainlendar.net/cms/index.php?option=com_easyfaq&Itemid=26#faq7))

Thanks anoob!! Yeah I was opening 3 calendars instead of using the advanced options to display 2 more. I had no idea there were so many features. This program is a MUST HAVE for any computer user!! Thanks anoob!!!
