
Linux Mint 15 64bit installation issue

Posted by rockneila - 2013/11/13 07:17

i'm using Linux Mint 64bit
when i installed the .deb file, it asked to remove "Chrome" browser
how to fix it ??
i need Chrome browser

thanx. http://www.rainlendar.net/cms/images/fbfiles/images/_____2013_11_13_20_42_51.png

Try installing Rainlendar from the command line:

```
sudo dpkg -i ./rainlendar2-pro_2.11.1.b129-1_i386.deb
```

That way it won't install the dependencies but it could also fail the installation if you are missing any of the needed libraries.
