---

Is it possible to have more than one todo list? That would be great. Thanks

Yes.

Right click -> Options... -> Skins -> Advanced>>> -> click on the plus sign beside "Shadow4" in the "Available skins" section to the left -> Select "Todo List" -> click on the pointing right black arrow -> OK -> Done!

You can add as many as you want.

EDIT: If you want to have one/many calendars in each task list without repeat, select them in the "active skins" section -> settings... -> included/excluded calendars
