
How do i move tasks easily?

Posted by necronome - 2013/12/04 13:29

Hi!

In an old installation of Rainmeter it was possible to drag and drop tasks directly in the task list view. Since i have installed a new version i am missing this option. I am using Rainlendar 64 Bit 2.11.1 with the skin shadow 4.

best regards,
nec

You need to change the sorting order of the task list to "Custom" to be able to drag the tasks to new positions.

Dear Rainy,

thanks a lot - that was exactly what i was looking for!

best regards,
nec
